

PRECISION MEDLAB SERVICES

Every Device Supports a Patient. Every Repair Matters.

Integrated medical, laboratory, imaging, and equipment support solutions for hospitals, urgent care, surgical centers, clinics, imaging centers, and clinical laboratories.

More Than a Biomedical Service Provider

Precision MedLab Services is a California-based medical device service organization built to function as an extension of your clinical engineering and operational infrastructure. We help healthcare facilities reduce downtime, simplify repairs, improve equipment reliability, and maintain continuity of patient care through responsive, scalable, and systems-driven service support.

Our model combines in-house technical capability with a managed network of qualified engineers, giving your facility one accountable partner for a broad range of medical, laboratory, and equipment support needs.

One Point of Contact	One Accountable Workflow	One-Stop Equipment Support
Simplified communication and service coordination across departments and device categories.	Service requests, work orders, documentation, parts, and follow-up are managed through a structured process.	Biomedical, imaging, laboratory, sterilization, respiratory, and specialty equipment support under one operational layer.

What We Help Facilities Solve

- Reduce equipment downtime and service delays that disrupt clinical operations.
- Decrease vendor fragmentation by coordinating multiple service needs through one organized partner.
- Support internal biomedical and facilities teams when resources are limited or equipment needs exceed in-house capacity.
- Provide practical alternatives to high-cost OEM service while maintaining safety, quality, documentation, and accountability.
- Improve traceability with clear work orders, service documentation, asset history, and communication throughout the service lifecycle.

Core Services

Preventive Maintenance & Safety Inspections Scheduled PMs, electrical safety inspections, compliance support, and performance checks.	Diagnostic & Corrective Repairs Troubleshooting, corrective repair, parts replacement, and return-to-service verification.
Calibration & Performance Verification Device testing, calibration support, verification, and documentation for clinical readiness.	Equipment Lifecycle & Asset Support Asset tracking support, service history, equipment recommendations, sourcing, and lifecycle planning.
Parts, Equipment Sourcing & Refurbishment Sourcing replacement parts, refurbished devices, loaner options, and replacement equipment when needed.	Rapid Response Service Coordination Centralized service intake, dispatch coordination, updates, and follow-through until the issue is resolved.

Specialty Vendor Management

When a specialized modality requires additional expertise, we coordinate qualified specialty engineers under Precision MedLab oversight.

Clinical Continuity Support

Practical solutions designed to keep essential equipment clinically available and reduce operational disruption.

Equipment Categories We Support

Precision MedLab supports a broad range of equipment used across hospitals, surgery centers, imaging centers, clinics, and clinical laboratories, including:

- Patient monitors and vital signs equipment
- Ventilators, respiratory, and critical care equipment
- Anesthesia systems and ESUs
- Infusion pumps and clinical support equipment
- Sterilizers, autoclaves, and reprocessing equipment
- X-ray and imaging support equipment
- Ultrasound systems and imaging accessories
- Laboratory analyzers and diagnostic instrumentation
- Refrigeration / freezer and specialty clinical equipment
- Parts, accessories, loaner devices, and replacements

Built for Biomedical, Facilities, and Operations Teams

We designed our workflows to make outsourced service easy, predictable, and trustworthy. Our goal is to support your internal teams, not replace them, by giving them a responsive partner that can help manage service demand and reduce operational friction.

- Simple service request submission through a dedicated service request portal or direct email to service@precisionmedlab.com.
- Clear work order creation, tracking, status updates, and dispatch coordination.
- Complete service documentation tied to the work performed, equipment details, and facility needs.
- Flexible scheduling around clinical operations, patient flow, and department availability.
- Transparent communication from request intake through completion and follow-up.

Our Commitment

At Precision MedLab Services, we believe every service should meet the same standards of safety, quality, communication, and accountability expected from OEM support while delivering greater responsiveness, flexibility, and value.

We are proud to support the teams who keep healthcare technology running safely every day. Our mission is simple: maximize device uptime, reduce downtime, extend equipment life, and help facilities maintain safe, compliant, and clinically available equipment.
